EXPERIENCE

Project Lead Systems Limited

09/2024 - Present Karāchi, Pakistan

Client: 1Link - Pakistan's Largest Payment and Switch System
Serving as the Project Lead and Full Stack Developer for two critical applications within Pakistan's largest payment and switch infrastructure. The first was a web portal built with Angular 9, and the second was a backend service developed using Node.js. The portal featured advanced search capabilities, file upload and export functionality, and comprehensive CRUD operations.

Key Responsibilities:

- Led the development teams for both the Angular frontend and Node.js backend.
- Optimized portal performance and loading speed.
- Resolved cross-browser compatibility and responsiveness issues.
- Enhanced backend application performance and ensured scalability.
- Conducted sprint kickoff meetings, daily scrums, and sprint review sessions.
- Managed client communication for both onsite and offsite coordination.
- Oversaw application deployment and release processes.

Tech Stack & Tools:

Angular, Node.js, JavaScript, jQuery, TypeScript, HTML, CSS, Oracle, Git, JIRA, TFS, Bitbucket

Lead Software Engineer Sixlogs Technologies

01/2019 - 08/2024 Karāchi, Pakistan

Developed and maintained full stack web applications using modern technologies such as Angular and Nodejs/Expressjs.
Collaborated with cross-functional teams including designers, product managers, and backend developers to deliver high-quality software solutions.

Designed and implemented responsive user interfaces, ensuring optimal user experience across multiple devices and platforms.
Created RESTful APIs to enable seamless communication between the front-end and back-end systems.

Utilized version control systems like Git to manage codebase and facilitate team collaboration.

Integrated third-party APIs and services to enhance application functionality and provide additional features.
Conducted thorough testing and debugging to identify and resolve issues, ensuring smooth functionality and performance.

Participated in code reviews to maintain code quality, provide constructive feedback, and suggest improvements.
Implemented security best practices and measures to protect applications from vulnerabilities and data breaches.
Actively researched and adopted new technologies, tools, and frameworks to improve development processes and stay up-to-date with industry trends.

Mentored junior developers, providing guidance on best practices, coding standards, and overall professional growth.

Tech Stack & Tools:

Nodejs · PostgreSQL · Database Design · Amazon Web Services (AWS) · Angular

SUMMARY

As a Project Lead at Systems Limited with over 7 years of experience in the Information Technology & Services industry, I bring a unique blend of hands-on technical expertise and strategic leadership. I specialize in architecting full-stack web applications using Angular, Node.js, and PostgreSQL, while also leading projects involving AI-driven solutions, enterprise CMS platforms, and data analytics tools.

My role extends beyond coding, I lead cross-functional teams, bridge communication between technical and non-technical stakeholders, and ensure on-time, quality delivery that aligns with business objectives. My approach is rooted in agile methodologies, continuous learning, and a strong belief in innovation as a driver of digital transformation.

What sets me apart is my commitment to building scalable, user-centric digital experiences that solve real-world problems. I thrive in collaborative environments and am always exploring emerging technologies to future-proof solutions. I'm eager to connect with like-minded professionals who are passionate about leveraging tech to make a meaningful impact.

KEY ACHIEVEMENTS

Accelerated Project Delivery

Led a cross-functional team to increase project delivery speed by 35%.

Optimized Data Processing

Implemented an AI-driven platform reducing data processing time by 50%.

Enhanced User Engagement

Architected a CMS platform increasing user engagement by 40% within six months.

Boosted Client Conversions

Developed a web app resulting in 20% more client conversions.

EXPERIENCE

Jr Web Developer

Expertek Cyber Solutions Inc, USA

📅 03/2018 - 01/2019

Developed and maintained responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.

Collaborated closely with UI/UX designers to translate design concepts into functional web pages with pixel-perfect precision.

Implemented front-end frameworks and libraries such as React.js, Vue.js, or Angular to enhance application interactivity and performance. Ensured cross-browser compatibility and optimized web pages for optimal loading speed and performance.

Integrated RESTful APIs and JSON data into front-end applications to enable dynamic content and seamless user experiences.

Conducted thorough testing and debugging to identify and resolve front-end issues, ensuring consistent functionality across different devices and platforms.

Worked closely with back-end developers to integrate front-end components with server-side logic, ensuring smooth data flow and communication.

Implemented responsive design principles to create mobile-friendly interfaces that provided a consistent experience across various devices.

Actively kept up with emerging front-end technologies and trends, continuously improving skills and proposing innovative solutions.

Participated in code reviews and provided feedback to ensure code quality, maintainability, and adherence to coding standards.

Collaborated in agile development environments, attending daily stand-up meetings and actively contributing to sprint planning and task estimations.

Tech Stack & Tools:

JavaScript · PHP · Html5 · WordPress · CSS3 · Bootstrap

Frontend Developer

AgenTcy

📅 10/2017 - 02/2018 📍 Karachi, Pakistan
